Professional Summary

Site Reliability Engineer with 4.5 years of experience maintaining 99.99% uptime and high availability across mission-critical enterprise workloads on AWS. Skilled in Kubernetes (EKS), Infrastructure as Code (Terraform, CloudFormation), GitOps workflows (ArgoCD, Helm), autoscaling (Karpenter, HPA), CI/CD automation, incident management, and FinOps cloud cost optimization. Experienced building observability and tracing pipelines with Prometheus, Grafana, New Relic, and Splunk, leading blameless postmortems, and driving reliability engineering through defined SLOs, SLIs, and error budgets.

Technical Skills

Cloud & Orchestration: AWS (EKS, VPC, EC2, S3, Route53, Transit Gateway, ALB, SQS, SNS), Docker, Helm, PCF
DevOps & SRE Tools: Terraform, CloudFormation, ArgoCD, GitOps, Karpenter, HPA, IRSA, RBAC, Bash/Shell, YAML, SQL
Observability & Security: Prometheus, Grafana, New Relic, Splunk, ELK Stack, Alertmanager, PagerDuty, Entra ID, OAuth 2.0, OIDC
CI/CD & ITSM: GitLab CI/CD, Jenkins, Bamboo, JFrog Artifactory, SonarQube, JIRA, ServiceNow
Operating Systems: Linux (Ubuntu)

Experience

Infosys (Client: Telstra)

Oct. 2023 – Present

Site Reliability Engineer / Technology Analyst

Hyderabad, India

- Kubernetes & Cloud Modernization:** Architected and executed the transition of 15+ mission-critical API services from PCF to AWS EKS using Terraform and Helm, boosting scalability by 40% and optimizing compute costs by 15%.
- Observability & SRE Framework:** Built custom Prometheus, Grafana, Splunk, and New Relic dashboards tracking system throughput, latency, and saturation; defined core SLOs, SLIs, and Error Budgets for production microservices, driving weekly InOps reviews and reducing MTTR by 45%.
- FinOps & Autoscaling:** Implemented Karpenter and Horizontal Pod Autoscalers (HPA) alongside automated resource tagging and lifecycle policies for S3 and EBS, reducing monthly cloud expenditure by \$2,000+ through orphaned resource cleanup.
- Authentication & Ingress Security:** Spearheaded the migration of authentication frameworks to Microsoft Entra ID (OIDC / OAuth 2.0) at the API Gateway layer, securing 50+ microservices, enforcing cluster-wide RBAC policies, and reducing authentication latency by 20%.
- GitOps & CI/CD Pipelines:** Orchestrated CI/CD transition from Bamboo to GitLab CI integrated with SonarQube quality gates and Artifactory binary management, leveraging ArgoCD GitOps workflows to reduce deployment failures by 30%.
- System Resilience:** Integrated automated liveness/readiness health probes and dynamic autoscaling within Terraform-managed VPCs to guarantee 99.99% infrastructure availability.

Infosys

Mar. 2022 – Sept. 2023

Site Reliability Engineer / System Engineer

Hyderabad, India

- Operational Excellence & Release Ops:** Automated Blue-Green and Canary release strategies for production microservices, ensuring zero-downtime updates and reducing production incidents by 30%.
- Incident Management & Postmortems:** Spearheaded Root Cause Analysis (RCA) and led blameless postmortems for Tier-1 incidents; configured threshold-based alerts using Alertmanager and Splunk to maintain system resilience.
- Toil Elimination & Automation:** Conducted toil-reduction initiatives by writing custom Bash scripts to automate routine operational tasks and environment maintenance, saving 10 hours/week of engineering toil.
- Security & Certificate Automation:** Programmed automated SSL/TLS certificate renewals via AWS Certificate Manager (ACM), eliminating manual renewal risks and identifying 10+ potential expiration blockers.
- Availability Management:** Maintained high-availability environments for Order Status Tracker services, overseeing SQS/SNS message durability and dead-letter queues for 1M+ daily transactions.

Key Projects & Contributions

Automated Cross-Region Disaster Recovery (DR) | AWS, Terraform, EKS

- Designed a Terraform-driven DR framework automating multi-region EKS workload replication and state synchronization, achieving a Recovery Time Objective (RTO) of less than 30 minutes during failover simulations.

Education & Certifications

JNTU, Kakinada

Aug. 2017 – May 2021

Bachelor of Technology in Mechanical Engineering (CGPA: 8.0)

Kakinada, India

Certifications: AWS Certified Cloud Practitioner | Microsoft Azure Fundamentals
